

## Alaska TACSEI Pyramid Partnership Flies a Flight Plan *Vision and Mission*

*In Alaska, where small planes are the mode of transportation for travel across the state, it is required to file a flight plan regardless of the distance between take off and landing at your destination. The flight plan details your route of travel, and requires calculated planning; much like the initial work of our Alaska TACSEI Pyramid Partnership.*

As the first order of business, the Leadership Team created a vision to provide members and participants of the Alaska TACSEI Pyramid Partnership a grander view of our purpose for the future.

### **The Alaska TACSEI Pyramid Partnership Vision**

**OUR VISION** is that all Alaskan environments for young children and their families have strong social and emotional foundations enhanced and strengthened through a caring network of professionals, parents, and community members.

The purpose of the Alaska TACSEI Pyramid Partnership **Mission** is to guide our daily implementation of the partnerships.

**OUR MISSION** for the Alaska TACSEI Pyramid Partnership is to design, implement, and sustain the Pyramid Model, a system of professional development practices for Early Learning professionals that consistently and collaboratively address the social and emotional needs of all Alaskan children birth-five and their families.

Next on our flight plan was to launch a method for frequent and consistent communication. A **Google Docs** site and a **Gmail account** were created for this purpose. To guide our communication, the Coordinator developed a **communications timeline** for the Leadership Team and **program management tool** (used internally).
